

STRIVE - THE EMPLOYEE APP

Reimagine the Employee Experience -
One Individual at a Time

Hi ,

We hope you are enjoying the updated app experience that launched last month! If you are unaware of all the exciting updates that were part of that launch, reach out to your CSM who can show you the updated experience and how to maximize the new solution. Here are some other updates happening at STRIVE:

Pilot Our EX Impact Package

Now through the end of the year, try a pilot of our EX Impact Package! Key features include:

- Custom challenges
- Custom recognition templates
- Unlimited SSO's
- All levels for redemption (Gift cards, retail, experiences, non-monetary)

You will also receive \$2 per employee for recognition funding for setting up recognition, challenges, and leveraging the explore section as your company intranet.

This pilot offer is free and no commitment with the ability to cancel and revert back to your current package at the end of the year.

For questions or to claim this offer, please reach out to your CSM by July 1st.

Drive Exploration

Update the explore section in your company app to provide your employees the documents and resources they need. From podcasts to employee handbooks, explore is the section for you to centralize company documents and more! To upload, go to the explore section in the admin portal or reach out to your CSM!

STRIVE Hot Tip

Haven't added a link to your payroll in the app yet? Allow your employees to easily access paystubs or other information they may need. Set up a SSO (single sign-on) connection for even easier access. Reach out to your CSM to get this established in your app!
