

STRIVE - THE EMPLOYEE APP

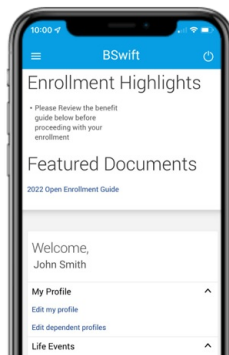

Reimagine the Employee Experience - One Individual at a Time

Hi ,

Request Your Free SSO Integration

To help create a seamless employee experience, request your free SSO (single-sign-on) integration! This integration will allow your employees to access their personal accounts without having to continuously enter their login information. By clicking on the tile in the app, they will be taken right into their account.

Common integrations include HRIS or Payroll platforms such as ADP, Paylocity, Paycor, or Workday, but we can integrate with just about anyone! As long as they have the capabilities and you are able to get us in touch with their team, we can make it happen! To request yours, please email [\[email protected\]](#) who will be able to get the process started. All we need from you right now is the initial introduction.

Security Improvement

To ensure we are at the cutting edge of security best practices, we will be enabling 2-Factor Authentication in mid-December. This new login flow will ask the user to validate their profile by using two pieces of information. You have likely experienced this yourself when prompted to enter a one-time code that you receive via text message for other systems.

This update will not require users to provide additional data or personal information nor will it require any work or lift from your team to activate. For any questions, please reach out to [\[email protected\]](#).

STRIVE Hot Tip

Ensure your app is up-to-date post Open Enrollment! Fill out our [App Request Form](#) and include any changes that will need to be made to your app. We will then make those changes live on the specified date for employees to be able to access.
