

Hi,

A reminder to join us on October 26th for our webinar on how to save time with STRIVE. With an increasingly overflowing workload, you can use STRIVE to proactively educate employees on information, resources, and benefits at their disposal while communicating with employees on a platform they check over 100 times a day: their cell phones. Register here.

Take a look at what else is brewing at STRIVE:

## **Community Tile**

Starting November 1st, we will be turning on the community tile for all clients. This will be the center of employee communications for employees to receive company announcements, wellness tips, benefit / program updates, and much more! Once live, employees will be able to like, comment, and share all posts.

If you would not like the community tile turned on, please reach out to your dedicated Client Success Manager or email [email protected] no later than October 27th.

## **Open Enrollment Support**

Open enrollment season is here and STRIVE can make it easy. Configure your app instance to be designed to make OE a breeze. Link to your BenAdmin, provide access to important documents and schedule OE meetings, directly in the app. Schedule time with your CSM to get your app ready for OE.

## **NPS Survey**

We always aim to improve the experience we provide to you and your employees. Please take a minute to fill out the following **survey** before October 31st. Your response will be critical to identifying areas of the app experience we need to improve to make the best employee experience app.

Begin building your community and creating unity by sending messages!

Unsure of how to create and send them? Utilize our <u>Admin Portal Resources</u> where we have step-by-step videos of how to send them quickly and easily!
