

Hi,

Take a look at some of the exciting updates that we have in store.

## **App Update**

Get ready for an upcoming app update on November 6th! In order to enhance the end-user experience, we are providing a few enhancements to bring a more personalized and dynamic user experience.

Here are some of the highlights:

- Personalized Dashboard Experience a dashboard that's tailor-made and shows the top priorities employees should complete daily. It is designed to give employees the most relevant content to stay in the loop.
- Recognition Template Show appreciation for each other by giving out a
  virtual high-five! Employers and employees can use this feature to
  recognize top performers by giving away stars that help them level up and
  can be used to cash in for prizes!
- Quarterly Custom Challenges To help support employee wellbeing, we
  are providing quarterly challenges! This quarter's challenge is to encourage
  employees to eat a healthy meal! Employees can now participate in this
  fun challenge to earn points daily while building healthy habits.

## **Web Application**

It's finally here! On November 6th, our web application will officially be live! This will be a mirror image of the app solution and help to further simplify access

across all devices. Using the same login credentials of the app, employees can now access their solution by web and utilize the same great features they have in the mobile solution.

## **Open Enrollment**

Open Enrollment season is here and our solution is here to assist you in smoothly navigating this process. Take a look at a few ways we can help:

- Easy Access to Benefits Information: Provides your employees with a
  comprehensive list of available benefits and documentation stored in one
  location. Provide employees with easy access to the necessary information
  to make informed decisions about their benefits.
- Seamless Plan Changes: Link to your BenAdmin system or Open
   Enrollment site to make it easier for employees to add or remove benefits
   from the system. Keep employees in the loop with up-to-date plan
   information throughout the open enrollment process.
- Improve Participation: Send push notification reminders to employees reminding them of important Open Enrollment dates to ensure they complete necessary tasks. Improve participation & engagement from employees.

Reach out directly to your Customer Success Manager or the Client Success team at <a href="mailto:clientsuccess@strivebenefits.com">clientsuccess@strivebenefits.com</a> for more information.

With flu season right around the corner, remind your employees of the convenience of telemedicine through our solution. Not only can employees receive virtual medical care for any potential flu symptoms, but they can also schedule a flu shot from the comfort of their own homes!

## - Your Client Success Team

\*EX Pilot is not available to those who purchased the solution after April 15, 2023
