

Hi,

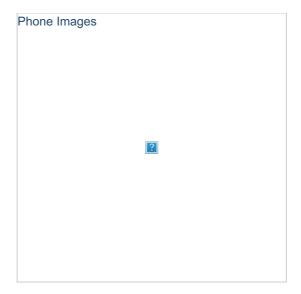

We have some exciting features on the horizon! From user-generated posts in the community tile to peer recognition, we are giving employees the chance to contribute!

Interested in being part of the pilot? All that is needed is your collaboration in the roll-out and feedback on the features. Our team will do the rest. Over the 2-month pilot, it will be a maximum of 2 hours of work on your part. As a thank you for your participation, we will provide a monetary reward to your organization.

There are **limited spots remaining**, so act fast if you want to snag a spot. Let your CS Manager know or email us if interested!

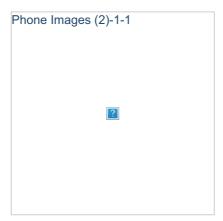

User-Generated Posts

Give your employees space to contribute and build camaraderie with their peers. From exciting life events to work-related updates, employees can add posts to the community tile. It's a fun and easy way to stay connected.

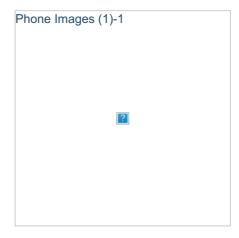

Gamification

Have important tasks you need your employees to complete? Incentivize them on a platform they use over 100 times a day - their cell phones. From setting up the activity tracker to creating a telehealth profile, provide them rewards that will motivate them and keep them excited.

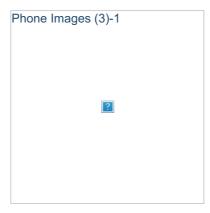

Employee Recognition

You get a reward. You get a reward. Everyone gets an award! Let employees acknowledge and reward one another publicly. With a set reward budget every month, employees are able to recognize those who have helped them at work in some way.

CSM and introduce them to your provider. Your CSM will then work with them to get the required data into the app. Make the shift after Open Enrollment a breeze by having the new ID cards already loaded.

A reminder that if you would like to join the pilot for any of the above features, please reach out to your dedicated Client Success Manager or email .
